

RAIN TANK SPECIFICATION PACKAGE

STORM has developed a specification and guideline package for installation, operation and maintenance of residential rain tanks plumbed for internal domestic use. The Package consists of up to 12 annotated drawings showing plumbing details for both **Manual & Automatic Bypass** for both **Above & Below Ground Tank** configurations, listed as follows:

General

- ✔ House and raintank configuration
- ✔ Installation, Commissioning & Maintenance Notes

Manual Bypass

- ✔ Rain tank detail
- ✔ Air gap & overflow detail (above ground only)
- ✔ Water reticulation & bypass schematic

Automated By-pass

- ✔ Rainwater tank detail
- ✔ Water reticulation & bypass schematic

Further guidance is provided to homebuyers by way of an **information brochure** explaining the beneficial use and operation of the plumbed rain tank.

The **benefits to Councils** include:

- ✔ Consistency of approach
- ✔ Flexibility in approach
- ✔ Compliance with AS3500 and CUPDR (Circular 18)

The **benefit to developers** is that it establishes reliable requirements where none already exist and that Councils will be comfortable adopting.

For information about purchasing the Package, or if you would like to adapt one to your own LGA's needs, contact Ashley Bond in our Illawarra office on 02 4237 6770.
