

# TRUCKWASH TREATMENT & RECYCLING

STORM\_CONSULTING worked with Yass Valley Council to design and construct a sustainable truckwash at the Council works depot.

The system demonstrates sustainable water management through combined washdown water and depot stormwater collection, treatment and recycling.

The system is reliant on a proprietary, automated treatment system to treat the wash water and stormwater. The system provides filtration, dosing, mixing, aeration and chlorination.

Design features include: a delivery/cleaner system; an easy to maintain sump/solids trap; & 'dirty' & clean water storage tanks. Mains water top-up is provided during dry periods

STORM also produced a dedicated, user-friendly Operation & Maintenance Manual for Council to operate the system.

The system cost \$70,000 to install and allows Council to comply with the POEO Act in respect of stormwater and wash water discharge.
